

ZAQ DAYTON

EXPERIENCE

2016 - 2017

WEB DESIGNER & FRONT-END DEVELOPER

Datanyze - San Francisco & St. Petersburg, Russia

Designed and developed application updates and revamps with an intensive UX approach utilizing various technologies, such as HTML, CSS, SASS, Bootstrap, JavaScript and jQuery.

2015 - 2016

UI DEVELOPER II

Fossil Group - Richardson, Texas

Took the lead in migrating the company's website from AEM CQ5 to CQ6 while content authoring new product lines, including Fossil's new wearable technology line. Created and developed an internal web analytics dashboard to see how promotions were doing in realtime.

2014-2015

UI/UX DESIGNER

Aptitude - Irving, Texas

Redesigned and rebranded the start-up's preexisting medical supply contracting application by conducting usability testing focusing on UX. Revamped and developed email notifications from the app, and created online and print marketing assets.

ABOUT ME

**Hi, I'm Zaq
a web designer and developer.**

I strive to be "ambidextrous" with my career. That's why I'm not just a designer, or just a developer. I'm both. Thus, giving myself an advantage over many others in my sphere. As a designer, I understand how designs translate into code and what's possible from a technical perspective. As a developer, I understand design concepts and have that artistic creativity that some developers tend to lack.
